Data Types

Name	Pattern	Note
Date	dd.MM.yyyy	Date without time
DateTime1	dd.MM.yyyy HH:mm	Date with time without seconds
DateTime2	dd.MM.yyyy HH:mm:ss	Date with time with seconds
Time1	HH:mm	Time without seconds
Time2	HH:mm:ss	Time with seconds
Number	###0	Integer
Decimal	###0.00	Decimal number

RestAuthentication

Definition

Field	Type	Description
username	String	username for web service
password	String	password for web service

Example

```
{
  "username": "XXXXXX@XXX",
  "password": "XXXXXXXXXXXX"
}
```

RestBankAccount

	String	
bankName	String	the bank name
bankAddress	String	the bank address
accountNumber	String	account number
swift	String	swift
iban	String	iban
sepa	String	sepa

```
{
  "bankName": "EXAMPLE BANK D.D.",
  "bankAddress": "-",
  "accountNumber": "1111111-1111111111",
  "swift": "SWIFT111",
  "iban": "HR11 1111 1111 1111 1111 1",
  "sepa": "SEPA111"
}
```

RestCharterBase

Definition

Field	Type	Description
id	Long	ID
locationId	Long	location ID
companyId	Long	charter company ID
checkInTime	Time1	check in time
checkOutTime	Time1	check out time
lat	Decimal	GPS Latitude
lon	Decimal	GPS Longitude

Example

```
{
  "id": 110527,
  "locationId": 51,
  "companyId": 110525,
  "checkInTime": "17:00",
  "checkOutTime": "08:00",
  "lat": 44.8726,
  "lon": 13.84513
}
```

RestCharterBaseList

Definition

Field	Type	Description
status	String	
errorCode	Number	Displays only if error occurred
bases	Array of RestCharterBase	

Example

```
{
  "status": "OK",
  "bases": [
    {
      "id": 110527,
      "locationId": 51,
      "companyId": 110525,
      "checkInTime": "17:00",
      "checkOutTime": "08:00",
      "lat": 44.8726,
      "lon": 13.84513
    },
    {
      "id": 579212,
      "locationId": 133729,
      "companyId": 110525,
      "checkInTime": "17:00",
      "checkOutTime": "08:00",
      "lat": 45.53419,
      "lon": 13.65292
    },
    {
      "id": 110529,
      "locationId": 60,
      "companyId": 110525,
      "checkInTime": "17:00",
      "checkOutTime": "08:00",
      "lat": 44.05391,
      "lon": 15.29812
    }
  ]
}
```

RestCharterCompany

Definition

Field	Type	Description
id	Long	company ID
name	String	company name
address	String	address of headquarters
city	String	city of headquarters
zip	String	zip postal code of headquarters
countryId	Long	country ID
phone	String	contact phone of company
fax	String	contact fax of company
mobile	String	contact mobile of company
vatcode	String	VAT code of company
web	String	website
email	String	e-mail address
pac	boolean	private access company (offline company)
bankAccounts	Array of RestBankAccount	

Example

```
{
  "id": 120920,
  "name": "Adriatic Challenge",
  "address": "Obala kralja Petra Krešimira IV. 38/a\n23210 Biograd n/M",

RestClient

Field	Type	Description
company	Boolean	obligatory filed, if client is company set to TRUE
vatNr	String	obligatory if client is a company
name	String	obligatory
surname	String	obligatory
address	String	
zip	String	
city	String	
countryId	Long	
email	String	obligatory
phone	String	
mobile	String	
skype	String	

Example

```

{
  "name": "Rest",
  "surname": "client",
  "company": "false",
  "vatNr": "",
  "address": "address",
  "zip": "",
  "city": "",
  "countryId": "1",
  "email": "someone@something.some",
  "phone": "",
  "mobile": "",
  "skype": ""
}

```

RestCountry

Definition

Field	Type	Description
id	Long	ID

code	String	optional short string representation of country (eg. DE, IT)
name	RestInternationalText	name

Example

```
{
  "id": 1,
  "code": "HRV",
  "name": {
    "textDE": "Kroatien",
    "textEN": "Croatia",
    "textHR": "Hrvatska",
    "textIT": "Croazia",
    "textSI": "Hrvatska"
  }
}
```

RestCountryList

Definition

Field	Type	Description
status	String	
errorCode	Number	Displays only if error occurred
bases	Array of RestCountry	

Example

```
{
  "status": "OK",
  "countries": [
    {
      "id": 100184,
      "code": "AFG",
      "name": {

RestYachtModel

Definition

Field	Type	Description
id	Long	
name	String	
yachtCategoryId	Long	
yachtBuilderId	Long	
loa	Decimal	
beam	Decimal	
draft	Decimal	
cabins	Number	
wc	Number	
waterTank	Number	
fuelTank	Number	
displacement	Number	

Example

```

{
  "id": 120254,
  "name": "1 - Custom",
  "yachtCategoryId": 1,
  "yachtBuilderId": 100241,
  "loa": 12.57,
  "beam": 3.45,
  "draft": 1.35,
  "cabins": 4,
  "wc": 2,

```

```

"waterTank":0,
"fuelTank":0,
"displacement":0
}

```

RestYachtModelList

Definition

Field	Type	Description
status	String	
errorCode	Number	Displays only if error occurred
models	Array of RestYachtModel	

Example

```

{
  "status": "OK",
  "models": [
    {
      "id": 120254,
      "name": "1 - Custom",
      "yachtCategoryId": 1,
      "yachtBuilderId": 100241,
      "loa": 12.57,
      "beam": 3.45,
      "draft": 1.35,
      "cabins": 4,
      "wc": 2,
      "waterTank": 0,
      "fuelTank": 0,
      "displacement": 0
    },
    {
      "id": 837012,
      "name": "Abacus 61 - 3 + 1 cab.",
      "yachtCategoryId": 101,
      "yachtBuilderId": 836999,
      "loa": 18.66,
      "beam": 5.0,
      "draft": 0.88,
      "cabins": 4,
      "wc": 3,
      "waterTank": 0,
      "fuelTank": 0,
      "displacement": 0
    }
  ]
}

```

RestYachtPrice

Definition

Field	Type	Description
periodFrom	String	period from this price is valid in format dd.MM.yyyy
periodTo	String	period to this price is valid in format dd.MM.yyyy

price	String	amount
currency	String	
type	String	DAILY or WEEKLY

Example

```
{
  "dateFrom": "01.01.2014",
  "dateTo": "23.05.2014",
  "price": 1050.00000,
  "currency": "EUR",
  "type": "WEEKLY"
}
```

RestYachtReservation

Field	Type	Description
id	Long	Official reservation number
uuid	String	Security code for web service actions on this reservation. NOTE: If the important data is changed on the reservation, the security code is changed also.
reservationStatus	String	Status of the reservation: INFO - just an offer. Doesn't block the yacht in that period, OPTION, RESERVATION - fix booking, STORNO - cancelled option or booking
waitingForOption	Boolean	
yachtId	Long	Details about the yacht.
periodFrom	DateTime1	Period from with check in date (date format is dd.MM.yyyy HH:mm)
periodTo	DateTime1	Period to with check out date (date format is dd.MM.yyyy HH:mm)
optionTill	String	Option valid till (dd.MM.yyyy HH:mm). Only if status is OPTION.
agency	String	Name of the agency
client	RestClient	Info about the client.
discounts	Array of RestDiscount	Array of discounts applied on price list price
additionalEquipment	Array of RestYachtReservationAdditionalEquipment	Array of selected additional equipment for this reservation. See RestYachtReservationAdditionalEquipment for more details
services	Array of RestYachtReservationService	Array of selected services at the base (includes obligatory services) for this reservation. See RestYachtReservationService for more details
priceListPrice	String	Ground/basic price
agencyPrice	String	Final price expected from agency to pay

clientPrice	String	Final price expected from direct client to pay
currency	String	Currency of reservation
paymentCurrency	String	Currency in which online payment could be executed, possible values are HRK and EUR
localizedFinalPrice	String	Client final price in paymentCurrency
onlinePaymentAmount	String	Price in paymentCurrency for online payment
approved	Boolean
